CACHET WINE

Specification	
Vinification	The plots are located on the lower slopes where the soil is rich and well-drained. The soils are predominantly silty, with limestone sub-soil. Each plot is harvested by a combination of machine and hand picking. The grapes are carefully pressed as soon as they reach the cellar. Once the juices have settled, they are slowly fermented at a 16/18°C, in concrete vats and in stainless steel tanks. The wine is aged on its fine lees for 7 months with regular stirring, enhancing structure, aromas and protecting the wine from oxidation.

Press Comments	Joanna Simon, The Festive White, Orange and Rosé Wine Guide 2024: "A breeze-fresh white with a yielding, rounded texture, from the shores of the Thau lagoon in the heart of Languedoc. Green apple, lime, pine and honey with a twist of citrus peel on the finish from a blend of Vermentino (which we're now supposed to call Rolle when it's not from Italy) and 20% Roussanne. "
