Specification

Vinification The plots are located on the lower slopes where the soil is rich and well-drained. The soils are predominantly silty, with limestone sub-soil. Each plot is harvested by a combination of machine and hand picking. The grapes are carefully pressed as soon as they reach the cellar. Once the juices have settled, they are slowly fermented at a 16/18°C, in concrete vats and in stainless steel tanks. The wine is aged on its fine lees for 7 months with regular stirring, enhancing structure, aromas and protecting the wine from oxidation.

Producer Domaine Saint Andre

Producer Overview In the heart of Languedoc , facing the town of Sète and Mont Saint Clair, cradled by the Lagoon of Thau, the Domaine Saint-André, with an area of 30 hectares, brings together all the traditional grape varieties of the Languedoc (Cinsault, Carignan, Chardonnay, Muscat, Roussanne, Vermentino and Viognier), to which are added certain Bordeaux grape varieties (Merlot and Cabernet Franc). Its vineyard benefits from a Mediterranean climate tempered by maritime influences. Its soil, predominantly clay-limestone, is conducive to the production of excellent quality wines.
